

Rachel Widome, PhD, MHS is a social epidemiologist and professor in the Division of Epidemiology and Community Health at the University of Minnesota's School of Public Health.

Dr. Widome studies how social and economic conditions influence chronic disease-related behaviors (such as sleep) and how policy impacts population health across the life course. She is the principal investigator of the START/LEARN cohort study, funded by the National Institutes of Health (NIH), which has evaluated the health and academic impacts of school-district-initiated policies that delayed high their schools' start times.
